

**BILL LEHMANN, PhD 1951**

...And as I think back on careers, I became a bureaucrat while you and Joanie Feynman Hirshberg and Robb Thomson all did real physics. After I left AFIT while you were at the Aeronautical Research Lab, I went to the AF Secretary's office, then to Director of Air Force Research and then the Air Force Weapons Lab. I couldn't hold a job so I retired and went to Chief Scientist of the Army Combat Development Center and then the University of New Mexico and the Air Force Scientific Advisory Board. Syracuse really helped me get a good sound understanding of physics, but I never really did the good physics research that you and Joanie and Robb Thomson did.

It was a good career, and there were very few days I didn't want to go to work.

And Barbara and I still enjoy our Sigma Pi Sigma news,

Bill

Josh - here are a couple more pix.
