

**HARRY BERGER, MS 1951**

Josh: I enjoyed Volume 2 of Physics Matters -- many good things going on. I was happy to participate in your call for news of Syracuse Physics people. I admit that I didn't recognize any of the other correspondence people -- most of them way after my time at Syracuse. I should have known Milt Fisher from the dates of his degrees but since he came back to the campus to do a degree in math-- my memory fails me.

My write-up on the index.html site is headed with Ph.D. '51 -- I don't suppose I can claim that as a real degree!

Good to hear what is happening at Syracuse.

Regards.

Harry Berger
